

HEALTHCARE COMMUNICATIONS

What exactly is SmartNav?

SmartNav uses a combination of the Earth's magnetic fields, wi-fi connectivity, and a limited number of BLE beacons to locate the patient inside of the facility, within 3 to 5 feet. The SmartNav app then guides the patient with turn-by-turn blue-dot directions similar to what users enjoy outdoors with Google or Apple.

Available as a native app or SDK and branded for your organization, SmartNav easily fits into your mobile strategy whether you are just starting or already have an established mobile app.

The BLE beacons are low cost, have a 3 year battery life and can be deployed and calibrated in just a few days.

Features At-A-Glance

- Blue dot guided, turn-by-turn directions
- Accuracy within five feet
- Automatic floor detection
- Re-routing when a user goes off-course
- Location-based notifications
- Favorite locations can be saved
- Intuitive menus and search options
- Easy to understand maps and graphics
- Real-time analytics
- Role-based Content Management System

Truly an industry-leading mobile wayfinding platform that delivers features beyond mobile wayfinding including:

- Technology platforms for non-mobile users
- Scalable geomagnetic-enabled technology
- Flexible API's
- Turn-key installations
- Full service and support
